

Important One Liner for All Agriculture Competitive Examination

Q. Father of Extension- **J paul Leagons**

Q. Father of Sociology- **August Commte**

Q. National agricultural innovation project was started in – **2005**

Q. Total number of national bureaux are – **six**

Q. Formula of coefficient of variance is - **SD/Mean *100**

Q. t test is generally used , when sample size is **< 30**

Q. The correlation coefficient lies between - **-1 to + 1**

Q. The experimental design ,which simultaneously control the variation in two directions is known as **LSD**

Q. The basic principles of field experimentation – **1) Replication 2)Randomized 3) Local control**

Q. The technique of analysis of variance was developed by - **R.A. Fisher**

Q. If fertility gradient of land is in two directions , the experimental design will be - **Latin Square design**

Q. The most commonly used measure of control tendency is - **Arithmetic mean**

Q. Cumulative frequency is also known as – **Ogive**

Q. The term ' Kurtosis ' was given by - **Karl Pearson (1906)**

Q. Laplace used the normal distribution in - **Analysis of errors of experiments**

Q. The important method of least squares was introduced by - **Legendre in 1805**

Important One Liner for All Agriculture Competitive Examination

- Q. The name “ Normal distribution “ was coined independently by - **Peirce Galton and Lexix , (1875)**
- Q. Normal distribution is also known as - **Law of error ,law of facility of error, lapace’s seconf law , gaussion law etc.**
- Q. Generalize mean is also known as - **Power mean or Holder mean**
- Q. The standard deviation is widely used measure of - **Variability ordisperson**
- Q. The term standard deviation was first used by - **Karl Pearson in 1894**
- Q. If mean , medium and mode is equal , then skewness will be – **zero**
- Q. Correlation’s are useful because they can indicate a - **Predictive relationship**
- Q. which ANOVA is used when the experimenter want to study the effects of two or more treatment variables - **Factorial ANOVA**
- Q. In field experiments the commonly used design is – **RBD**
- Q. For chi- square test , the minimum sample size should be – **50**
- Q. The term “ water harvesting “ was first used by – **myors**
- Q. The force working with the attraction of water molecules toward each other is known as – **Cohesion**
- Q. The force working with the attraction of water molecules toward solid particles is known as – **Adhesion**
- Q. The water held tightly to the surface of soil particles by adsorption forces is known as - **Hygroscopic water**
