**1. Which of the following elements is essential for the storage of energy in plants?**

- A. Nitrogen**
- B. Oxygen**
- C. Carbon**
- D. Phosphorus**
- E. None of these**

**Correct Answer – D. Phosphorus**

**Explanation: Plants must have phosphorus for normal growth and maturity.**

**Phosphorus plays a role in photosynthesis, respiration, energy storage and transfer, cell division, cell enlargement and several other processes in plants.**

**A plant must have phosphorus to complete its normal production cycle.**

**2. Maximum productivity of sugarcane in India is--**

- A. Tamil Nadu**
- B. Haryana**
- C. Uttar Pradesh**

**D. Punjab**

**E. None of these**

**Correct Answer – A. Tamil Nadu**

**Explanation: Though Maharashtra and Uttar Pradesh contribute the major share of sugarcane production in India, Tamil Nadu ranks first in productivity.**

**Though Tamil Nadu accounts only for about 11 per cent of the production and nearly 6 per cent of the area under sugarcane of the country, it has unique distinction of giving highest yield of 1,067.8 quintals/hectare.**

**3. The Commission for Agricultural Costs and Prices was established in the year –**

**A. 1990**

**B. 1988**

**C. 1987**

**D. 1985**

**E. None of the above**

**Correct Answer – D. 1985**

**Explanation: Commission for Agricultural Costs and Prices (CACCP) is a decentralized agency of the Government of India.**

**It was established in 1965 as the Agricultural Prices Commission, and was given its present name in 1985.**

**It is an attached office of the Ministry of Agriculture and Farmers Welfare, Government of India.**

**The main aim of this organization was to give the values of the crops in the country.**

**4. Coccidiosis is a disease caused in poultry by which of the following microorganisms?**

- A. Bacillus**
- B. Fungi**
- C. Bacteria**
- D. Protozoa**
- E. None of these**

**Correct Answer – D. Protozoa**

**Explanation: Coccidiosis is a parasitic disease caused in poultry that could cause severe losses.**

**It is caused by protozoa of the phylum Apicomplexa family Eimeriidae.**

**It infects various sites in the intestine causing tissue damage, blood loss, dehydration, and poor absorption of nutrients.**

**5. Which of the following regions receive the monsoon first?**

- A. Coastal region of Gujarat**
- B. Bay of Bengal region**
- C. Coastal region of Maharashtra**
- D. Coastal region of Kerala**
- E. None of these**

**Correct Answer – D. Coastal region of Kerala**

**Explanation: The Arabian Sea Branch of the Southwest Monsoon first hits the Western Ghats of the coastal state of Kerala, India, thus making this area the first state in India to receive rain from the Southwest Monsoon. The eastern areas of the Western Ghats do not receive much rain from this monsoon as the wind does not cross the Western Ghats.**
